DEPARTMENT OF CSE

DATA ANALYTICS
ASSIGNMENT QUESTIONS

1. Explain about Data Management? How to manage the data for analysis?
2. What are the application of Data Analytics.
3. Explain about Data Architecture. What are the factors that influence the data architecture?
4. Write in detail with examples, various sources of data like sensors, signals GPS in data management
5. Define Database. Also explain types of Data with real time examples.
6. Demonstrate the various steps involved in data analytics.
7. Discuss in detail about the tools and environment needed for data analytics.
8. Define Primary data Sources and also explain the types of primary data source.
9. Describe about data Quality, Outliers, Noisy Data and its effects
10. Explain about Missing values and explain the process to eliminate Missing Values
11. Explain in detail about need for business modeling
12. Explain about Data Modelling types along with its applications.
13. Illustrate with an example, the importance of GPS coordinates in Data Management and Analytics
14. Explain the process and steps for Data cleaning.
15. Differentiate between structured and unstructured data.
16. Discuss and differentiate in detail about SQL and NOSQL.
17. Explain Cluster computing with a neat sketch.
18. Explain in detail about Scala and Apache Spark with their features.
